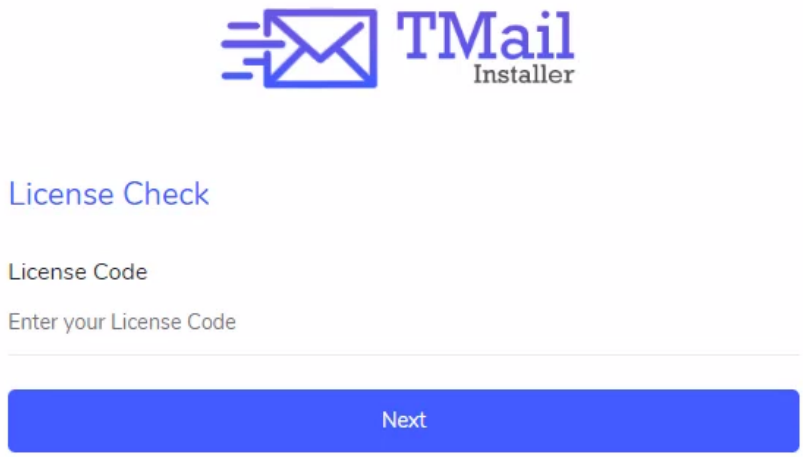
# TMail Installer

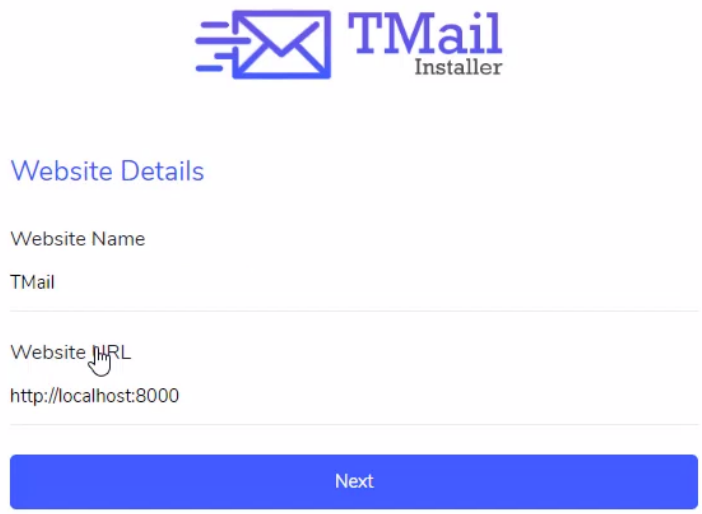
## #1 – License Key

Navigate to your website and you will be redirected to TMail Installer. At first screen you can see the Video Tutorial of how you can install TMail. When you hit Next, you will be asked for your License Key. Just enter the license key which you received after buying TMail.



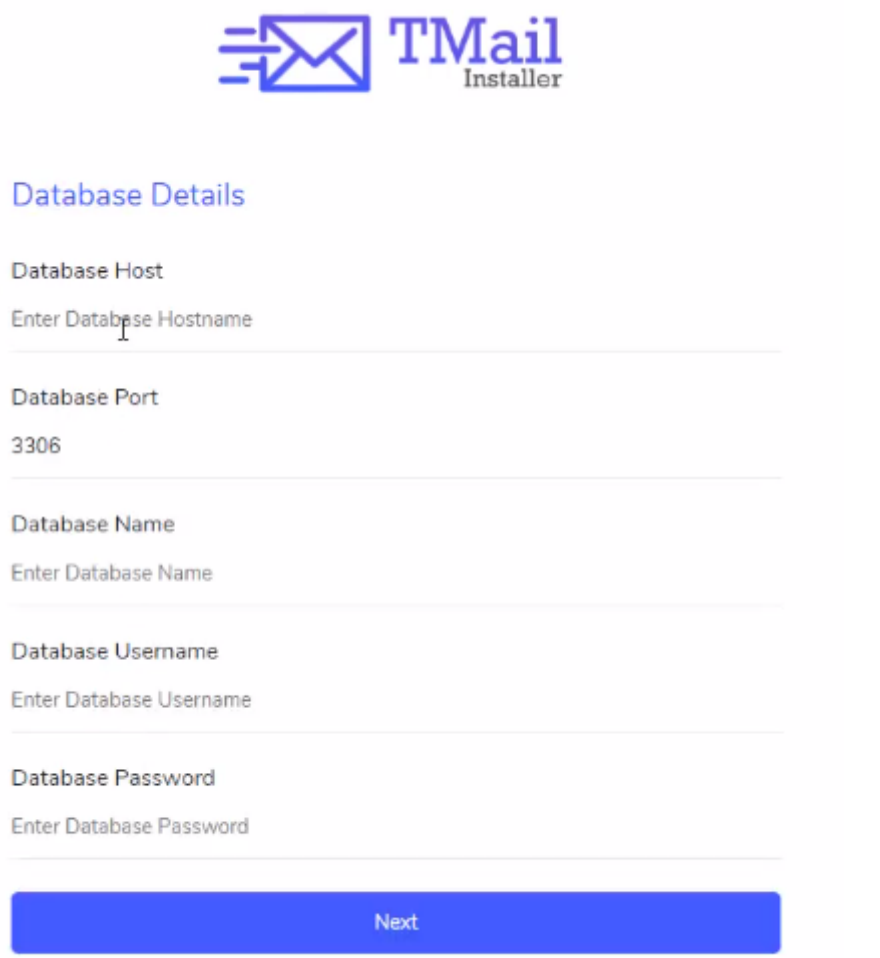
## #2 – Website Details

You will be asked to give your website a title and specify the URL of your website

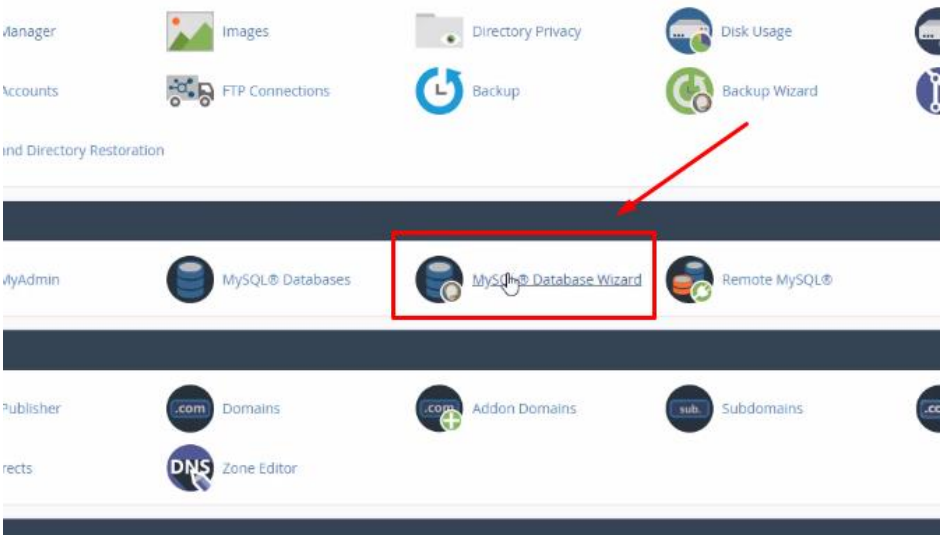


## #3 – Database Details

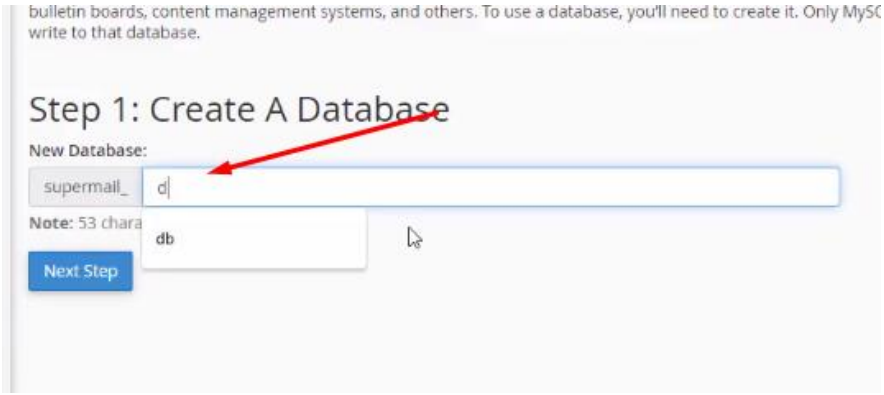
Here you need to provide details about the database.



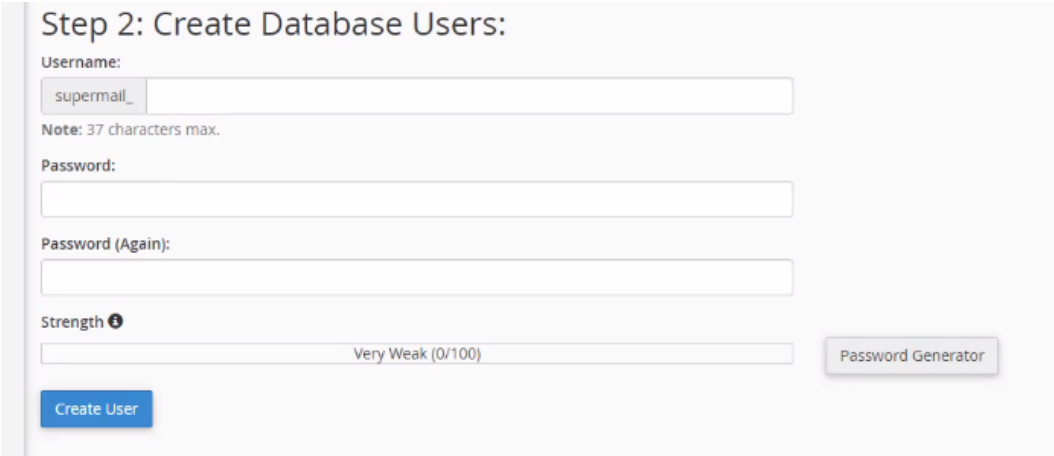
To create a database, goto MySQL Wizard



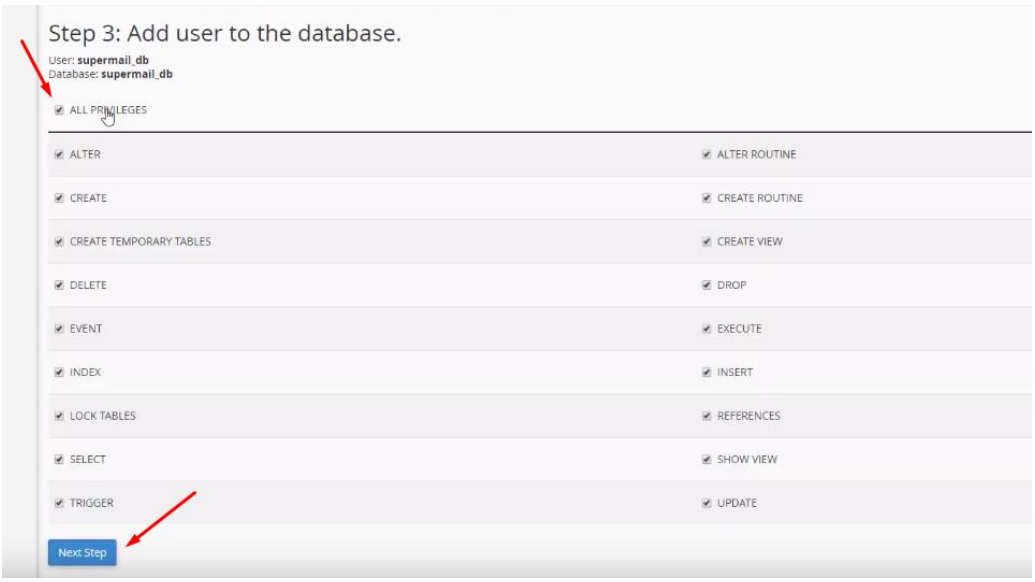
Give a name to your Database here and click “Next Step”



Create a user and password and hit “Create User”

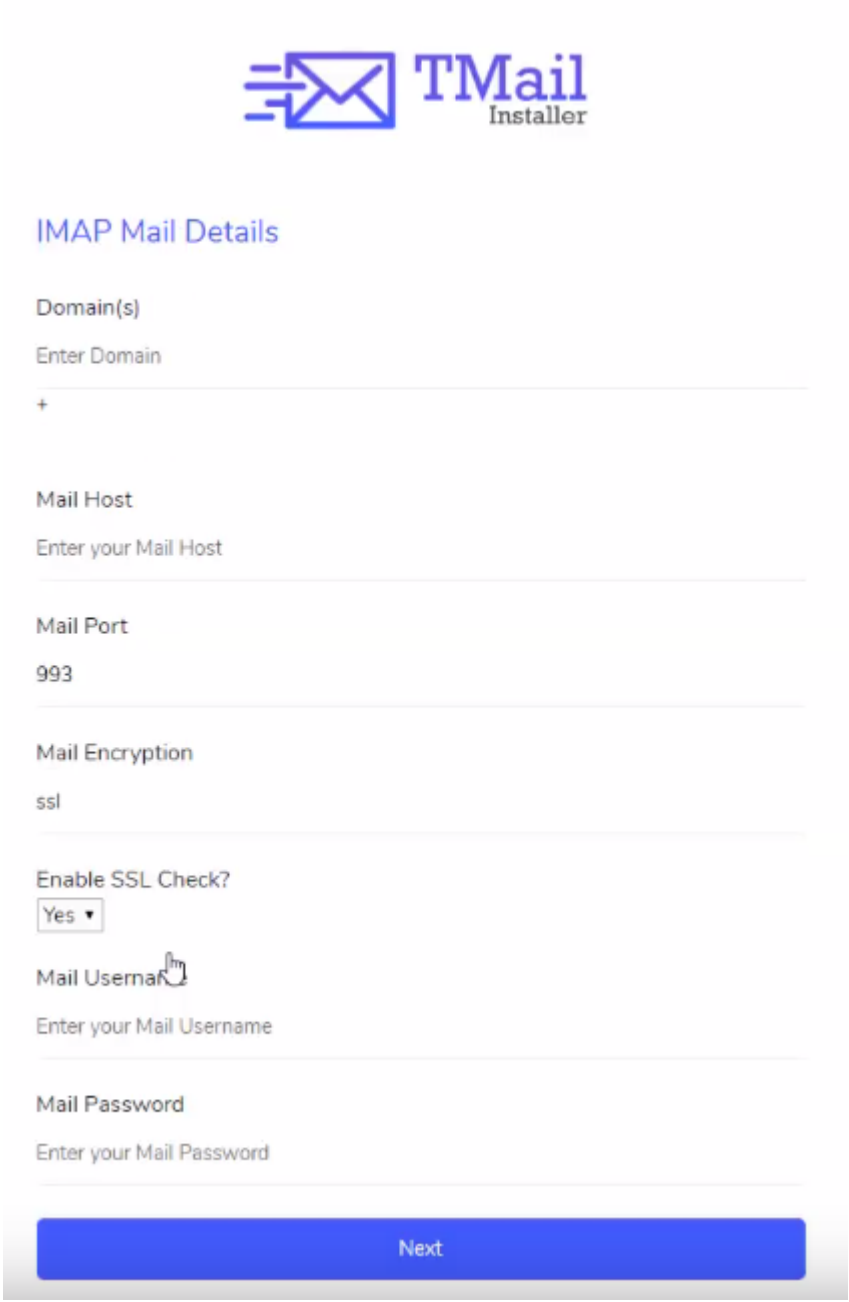


Assign this user to the database created by clicking on that checkbox and hit “Next Step”



## #4 – Email IMAP Details

Here you need to provide details about the email account



Select “NO” in Enable SSL Check if you are not sure about that.

Mail Host can be your domain name as well, if you are using the same email service as your hosting provider.
